

Northwest Pipe Company's Water Transmission Group Awarded Davis Woodland Water Supply Project

VANCOUVER, WA -- (Marketwired) -- 01/15/15 -- Northwest Pipe Company (NASDAQ: NWPX), an industry leader of engineered welded steel pipe products, was selected to provide 77,089 feet of cement mortar lined and tape coated spiral welded pipe ranging in diameter from 24 to 36 inches for the Davis Woodland Water Supply Project. The pipeline is being constructed by Mountain Cascade, Inc. out of Livermore, CA. The pipeline will transport raw water from the Sacramento River and provide an expanded infrastructure capacity to this Northern California region.

"The Davis Woodland project was a very unique project as it utilized the Design-Build-Operate (DBO) procurement method for one of the largest 2015 pipeline jobs in the State of California," said Scott Montross, President and CEO of Northwest Pipe Company. CH2M Hill is leading the design and construction management effort for the project and Mountain Cascade will lead the pipe installation.

"The ability of Northwest Pipe to work through numerous design modifications quickly and provide cost saving recommendations proved Northwest Pipe Company to be a valuable partner," said Duke Fuller, President of Mountain Cascade.

The pipeline installation is anticipated to commence by the end of March 2015 and be in operation by the middle of 2016. The water supply will be owned by the Woodland-Davis Clean Water Agency.

About Northwest Pipe Company

Northwest Pipe Company is a leading manufacturer of welded steel pipe and tube products. The Water Transmission Group is the largest manufacturer of engineered steel pipe water systems in North America. With eight Water Transmission manufacturing facilities, the Group is positioned to meet North America's growing needs for water and wastewater infrastructure. The Water Transmission Group serves a wide-range of markets and their solution-based products are a perfect fit for applications including: water transmission, plant piping, energy, tunnels, river crossings, structural, industrial and construction. The Tubular Products Group operates a state of the art electric resistance weld mill facility. The Tubular Products portfolio serves a wide-range of markets and its quality certified pipe and tube products are good for applications including: oil and gas, structural industrial, fire protection, low pressure and agricultural. The Company is headquartered in Vancouver, Washington and has manufacturing facilities in the United States and Mexico.
